

AMENDMENTS

Please amend the application as indicated hereafter.

In the Claims

Please amend the claims to read as follows:

- Sub C1
- Q1
1. (Currently Amended) A method for comparing investments selected by a user with at least one activity also selected by the user, through a computer accessible for on-line interactive communication with users, comprising the steps of:
 - a. maintaining a list of activities with the capability of the user selecting at least one activity from the list;
 - b. maintaining a database of the investments of investment funds with information on each investment as to the list of activities and identifying the activities directly or indirectly engaged in by each investment; and
 - c. providing an interactive on-line access to users to select a at least one activity and screen selected investment funds in respect to any activity selected.
 2. (Currently Amended) The method Claim 1 of providing users with the capability of selecting at least one activity and providing search engine capability to design a search of funds to fit the user's selected activity.
 3. (Currently Amended) A computer readable substrate having a computer program saved thereon, said computer program comprising the steps of:
 - a. providing a user with on-line access to a list of activities homepage and a list of funds homepage;
 - b. providing said user with the capability of selecting at least one activity from the list of activities; and
 - c. providing said user with the capability of selecting a fund and screening that fund for any activity selected by the user.

4. (Currently Amended) A system for the supply of information concerning whether any investment of a selected investment fund is directly or indirectly involved in any activity related to an activity selected by the user from a list of activities comprising:
- a first memory area for storing a list of activities; and
 - a second memory area for storing information on the list of activities engaged in directly or indirectly, by an investment fund in a list of investment funds.
5. (Currently Amended) The system of Claim 4, wherein said computer system is programmed to perform steps comprising:
- providing a user with on-line access to the list of activities homepage and to the list of investment funds homepage, said list of activities homepage linking to said first memory area, said list of investment funds homepage linking to said second memory area;
 - providing on-line capabilities of viewing each of the homepages and selecting an activity and investment fund; and
 - providing on-line capability of screening each investment fund selected in relation to the activity selected and providing the user with the capability of viewing the results.
6. (Currently Amended) The system of Claim 5 of providing the user with search engine capability to design a search of investment funds that meet the user's criteria of activities.
7. (New) The method of claim 1 in which the database of investments of investment funds also identifies the extent of an investment's involvement in each activity on the list of activities for such investment.
8. (New) The system of claim 4 in which the second memory area also stores information on the extent of an investment fund's activity in each activity stored in said second memory area.
